My 10 Favorite Oncidiums and Some Notes On Their Culture

presented by Doug Overstreet

Monday, July 22, 2019

Presentation starts at 7:30 p.m.

The Oncidium alliance is a HUGE group of orchids and there is no way to really do an overview of the group that wouldn't take the whole day! So I'm going to limit it to 10 plants and talk about them and their culture. I'll also discuss the name changes and some of the reasoning behind them.

DOUGLAS OVERSTREET has grown orchids continually since he was 10 years old. He comes by his interest in plants and animals naturally. His family have been American farmers since 1684. The first orchid he purchased in 1972 was *Cattleya Trimos*, a primary hybrid between *C. trianaei* and *C. mossiae*. The first orchid he flowered was a *phalaenopsis* hybrid.

Doug moved to California in 1975 and continued his love affair with orchids. In 1984, his collection began to grow by leaps and bounds with his first professional job. He also became a very active participant in the local orchid community. He began to work with orchids professionally in 2000 as a private consultant. Gradually, this became his full-time occupation. He has managed private collections for leading hobbyists in Southern California for the last 15 years. He is an Accredited American Orchid Society Judge in the Pacific South Region. An accomplished writer and educator, Doug has written articles for many different publications including *Orchid Digest* and has served on the Editorial Committee of that publication as Assistant Editor. He has spoken for orchid societies and other groups nationwide. Prior to joining the Huntington full time as a horticulturist, he was a frequent guest lecturer for the Huntington. Currently, he is the orchid specialist in charge of the Thornton Conservatory and the Ernest Hetherington Memorial *Cattleya* Collection.

President's Message

Summer is finally here along with the heat it will change the dynamics of your garden and your orchid growing. If you are growing outside make sure you revisit your watering cycle to make sure all your plants are properly hydrated. Fortunately I installed a complete sprinkler system so I just increase watering times as the weather changes since I grow everything outside. For all of you that were at our last meeting we saw that Russ built the Rolls Royce of greenhouses so now that he has it up and running he has no worries about his orchid collection when the weather changes. Back when I first joined SCOS in the late 90's Pat saw Dr Phil Plocher's greenhouse at one of our Sunday SCOS Board meetings. Dr Phil's was similar to Russ's but much smaller. She said why don't you build a greenhouse like Dr. Phil's and I said ok. When I told her it cost \$25,000 to build we decided that with 4 kids starting college we would put it off for a while. But with Russ this is his time to shine and enjoy the fruits of his labor. His presentation was one of the best ones we have had recently. His trials and tribulations in finally completing his greenhouse was very entertaining, I don't know if I would have the energy to complete a project like that. Congratulations Russ.

I won't see you at the meeting this month because Pat and I are celebrating our 50th wedding anniversary on Kauai with our Family 4 kids 9 grandkids 19 total on the island of Kauai.

Aloha

John and Pat
