

South Coast Orchid Society

Summary of July, 1954 meeting as published in *Orchid Digest*

Dr. Wm. Burns gave an interesting talk on Orchid Seed Flasking and Culture. He has worked out a very simple, yet completely sterile, method of flasking the seeds, something for us who have not yet made any crosses or done any flasking to think about. The Plant Forum was conducted by Dr. Burns and Mr. Paul Baker with 70 fine plants of all genera on the display tables.
