JANE BRECHT
ASSISTANT EDITORS

PLACE: Petroleum Club - 3636 Linden Avenue, Long Beach, California

It is again Banquet time and as in the past we expect an excellent turnout. The menu is outstanding and the decorations by Jerry Worthen will be a sight to behold.

Our speaker for the evening will be Rod I. McLellan of Acres of Orchids in South San Francisco. Mr. McLellan is well known throughout the Orchid World and is one of the world's largest growers and breeders of fine orchids. He has travelled extensively throughout the world and collected orchids from all over. The Rod McLellan Company has one of the largest collections of selected species. The title of Mr. McLellan's speech is "From Acres of Orchids to Singapore." The McLellans have recently returned from the 4th World Orchid Congress in Singapore so we are especially privileged to have him talk to us and tell us some of the doings of the Congress.

If you haven't made your reservations with Mrs. Czeikowitz please do so at once. This evening will be one long to be remembered so let's all be there to enjoy all the festivities and surprises.

PLANT PROCUREMENT

The plants for the December meeting were furnished by the Paul Brecht Orchid Company and consisted of many fine seedlings and flowering plants. Donations were received by Johnston Orchids, Southern California Greenhouse Co., Rheinfrank and Hudson, and Woody Wilson. Many thanks to all the donors.

NOVICE CLASS

The Novice Class met at the Paul Brecht Orchid Company on January 5. Despite the terrific wind storm 68 people attended. An informative discussion was given by Paul Brecht on the care of Cattleyas for this season of the year. This was followed by a question and answer session.

The next meeting of the Novice Class will be held on February 2, 1964, 10 a.m., at the home of Mr. and Mrs. Clarence Mason, 611 Crest Avenue, Huntington Beach, California.

PLANT FORUM

Due to the smog damage our usual display was cut down a bit but we do appreciate those people bringing out what they could for the display. Interesting and informative comments were made by Paul Jones and Clarence Mason.

REMEMBER: THERE WILL BE NO JUDGING AT THE BANQUET

For the first time in sixteen years we have produced enough stock to share with you orchid lovers.

Ten thousand seedlings available in 2½-inch pots. These are from our regular stock, valued at \$3.00 to \$5.00 each, but for our February and March Sale all plants are only 95c each. In quantities of 10 plants you can expect 20% white, 10% yellow and 70% colored. We will not ship less than 20 plants and \$1.50 shipping cost should be added for each 20 plants. California purchases add 4% sales tax.

Here are some of our crosses —

135	C. Gardena x Blc. Shining Harvest	Unusual Colors
139	Bc. Ilene x Blc. Alice Muller	Yellow
150	Blc. Alice Muller x Blc. Golden Feather	Yellow
160	Blc. Shining Harvest x Blc. Alice Muller	Yellow to Green
156	C. Ave Maria x C. Bob Betts	White
163	C. Marmari x C. Gardena	White
141	Lc. Memoria Leung Nui x Blc. Normans Bay	Very Dark
151	Lc. Gitchie Mainito x Blc. Shining Harvest	Intense Dark
159	C. Genevieve Toy x C. Portiata	Dark

All of these crosses are from Award Parentage

LET OTHERS BREED THE QUANTITY, STEWARTS WILL CONTINUE TO BREED THE QUALITY!

We don't try to be the biggest orchid grower, but we work night and day the year around to be the best.* This is why we have a world wide reputation for having the kind of seedlings and proven stock that knowledgeable growers desire. It is no "great secret" that it's easy to buy orchids. Too often, however, the beginner finds the bargain deal was not such a good buy. When we offer stocks we feel "if it isn't good enough to keep ourselves it should not be offered." This is why so many growers speak with pride when they show the plants they got from Stewarts. Yes, we let others breed the quantity. We'll continue to work on quality.

A new Stewart temptation

Bare Root Seedlings — bulb and leaf length 3"-6", ready for 2½" and 3" pots.
S-745 Blc. NORMANS BAY (Blc. Normans Bay 'Ruby' AM/AOS x Blc. Normans Bay 'Gothic' AM/AOS). One of the world's 2 most famous purples crosses. The two forms used in this sybling cross are what we consider to be the finest NORMANS BAYS. South Coast SPECIAL — Bare Root seedlings — \$3.00 each.

*No, we are not the largest, however, we do have
over 90,000 square feet of Orchid houses.

ADVERTISING
SOUTH COAST ORCHID SOCIETY, INC.

Three BIG reasons why you should do your
orchid shopping at Armacost & Royston.

1. You can buy the best possible quality plants for your money. Prices to fit any budget.
2. Centrally located. Open seven days a week to visitors. No guide necessary. Look at the plants and our complete line of orchid supplies at your leisure.
3. We have a courteous, friendly staff to assist you with your selections, as well as advise you with your cultural problems.

Come in and see us, and give your reasons why you think you shouldn't patronize Armacost & Royston. We'd like to hear them.

At Last! THE BREAKTHROUGH YOU
HAVE BEEN WAITING FOR!
Agricultural Enzymes

A Vital Supplement To Increase Plant Growth

**Just spray it on and watch the
results you have always wanted**

"WHAT ARE ENZYMES?"

Enzymes are nature's chemical tools. They act as organic catalysts that speed up chemical changes in cells without taking part in the change themselves.

These enzymes, amylase and protease, break down the complex food materials into simpler, more assimilable forms. As a result, this encourages growth of roots, foliage, and stimulates early blooms. Leaves assume a more erect stance and plants become more tolerant to light.

Orchid-zymes are compatible with other insecticides, fungicides, and fertilizers and may be applied in conjunction with these, even in a "shot gun" application. "Orchid-zymes" is **not** just another plant food, but truly a **new and proven** product that contributes to the growth of plants.

It is completely available to plants giving **quick and lasting** results.

An Important Bonus: "Orchid-zymes" will greatly reduce algae on pots, benches, compost and floors. It dissolves the unsightly white encrustations of fertilizers and chemicals that normally burn sensitive root tips.
