PROGRAM

June 22, 1964 - 8:00 p.m. - 10:00 p.m.

Mr. Paul Gripp, Manager of Santa Barbara Orchid Estate will speak to us about the care of Cymbidium orchids after the blooming season. Paul was graduated from U.C.L.A. with highest honors in Ornamental Horticulture and has been full-time grower and manager for Mr. Chrisman at Santa Barbara Orchid Estate ever since.

This will be an excellent opportunity for you to bring your friends that are interested in growing Cymbidium orchids. Mr. Gripp has an outstanding background in this field and we are sure that we will get some good pointers from him.

Last month's speaker, Mr. Leo Holguin, Manager of the Orchid Division at Armacost & Royston discussed "Blue Cattleyas". It was a very interesting meeting. Leo had some of us fooled with two "blue" Cattleyas he brought for display!

PLANT PROCUREMENT

Paul Gripp will bring a selection of plants with him from Santa Barbara Orchid Estate. We can expect some fine plants from Mr. Chrisman's range in Santa Barbara.

Last month's plants were from Armacost & Royston in West Los Angeles. A special bonus of a flask of *C. Trianae* "Blue Bird" went to one lucky winner. We also had welcome donations of a watering wand from Rheinfrank & Hudson and a Humidiguide from Southern California Greenhouse Manufacturers for two lucky winners.

PLANT FORUM

Thanks to Nell Howard and John Hanes for their capable descriptions of the many beautiful plants brought in by our members.

COFFEE BREAK

We are experimenting for the next month or two by having our coffee break at 9:00 p.m. just after our guest speaker. We tried it last month and most of you liked it then.

LIBRARY

We would like to thank Mr. and Mrs. Carl Unruh for their valuable donation of a complete set of Orchid Digest magazines from 1948 through 1964 to our library. They are greatly appreciated.

NOVICE CLASS

A grand time was had by all on the bus trip June 7 to Frank Fordyce's down by Carlsbad. Everyone took a box lunch and Frank welcomed them with a big cake. Frank has a new amphi-theater, that our group named "The Orchid Bowl", where he can entertain visiting orchid societies.

The next novice meeting will be held July 12 (instead of the first Sunday due to the holiday July 4) at Armacost & Royston's, 2005 Armacost Ave., West Los Angeles. This will be "Certificate" meeting for those who have qualified. The meeting will start at 10:00 a.m.

SOUTH COAST & ORCHID DIGEST REGIONAL JUDGING AWARDS

May 25, 1964

Judges present: J. Lloyd Wallar, Vice Chairman
John Hanes Roy Field
Elva Hanes W. C. Wilson

At last! THE BREAKTHROUGH YOU
HAVE BEEN WAITING FOR!
Agricultural Enzymes

A Vital Supplement To Increase Plant Growth

Just spray it on and watch the results you have always wanted

"WHAT ARE ENZYMES?"

Enzymes are nature's chemical tools. They act as organic catalysts that speed up chemical changes in cells without taking part in the change themselves.

These enzymes, amylase and protease, break down the complex food materials into simpler, more assimilable forms. As a result, this encourages growth of roots, foliage, and stimulates early blooms. Leaves assume a more erect stance and plants become more tolerant to light.

Orchid-zymes are compatible with other insecticides, fungicides, and fertilizers and may be applied in conjunction with these, even in a "shot gun" application. "Orchid-zymes" is **not** just another plant food, but truly a **new and proven** product that contributes to the growth of plants.

It is completely available to plants giving **quick and lasting** results.

An Important Bonus: "Orchid-zymes" will greatly reduce algae on pots, benches, compost and floors. It dissolves the unsightly white encrustations of fertilizers and chemicals that normally burn sensitive root tips.
