### LAST MEETING

Many thanks to Harry Rapella, our scheduled speaker, who stepped aside so that Mr. Gordon Dillon, Executive Secretary - Editor, of the American Orchid Society could talk to us. His humorous subject was "Psychoanalysis of Orchids." We enjoyed his talk immensely and seeing his very unusual slides.

Our large plant table was supplied by Harry Rapella from his range in Hawthorne. An added surprise were Miniature Cymbidium seedlings from Mrs. Menninger in Arcadia. Two flasks of miniature cymbidium seedlings were donated by Lloyd DeGarmo. We wish to express sincere thanks to So. Calif. Greenhouse Mfgs. for their donation of a watering wand and to Rheinfrank & Hudson for two bottles of Mermade Fish Emulsion.

Plant Forum Chairman, Paul Jones, appointed Frank Fordyce to assist him in a quick discussion on the plants brought by our members. We want to thank Fred Stewart Co., Westenberger Orchid Co. and Frank Fordyce Orchids for their lovely table displays. We enjoyed them very much.

Following are a few of the lucky winners last month: Exhibitor's Award, Mrs. Bobbi "Lucky" Saltsman; Bonus Award, John Vidulich. The following people missed winning the Membership Drawing because they were not present: Francis Gately, Mr. & Mrs. George Allison, Mr. and Mrs. C. A. Hall. The winner was.....John Vidulich!

## At Last! THE BREAKTHROUGH YOU HAVE BEEN WAITING FOR! Agricultural Enzymes

### A Vital Supplement To Increase Plant Growth

**Just spray it on and watch the results you have always wanted**

#### "WHAT ARE ENZYMES?"

Enzymes are nature's chemical tools. They act as organic catalysts that speed up chemical changes in cells without taking part in the change themselves.

These enzymes, amylase and protease, break down the complex food materials into simpler, more assimilable forms. As a result, this encourages growth of roots, foliage, and stimulates early blooms. Leaves assume a more erect stance and plants become more tolerant to light.

Orchid-zymes are compatible with other insecticides, fungicides, and fertilizers and may be applied in conjunction with these, even in a "shot gun" application. "Orchid-zymes" is **not** just another plant food, but truly a **new and proven** product that contributes to the growth of plants.

It is completely available to plants giving **quick and lasting** results.

**An Important Bonus:** "Orchid-zymes" will greatly reduce algae on pots, benches, compost and floors. It dissolves the unsightly white encrustations of fertilizers and chemicals that normally burn sensitive root tips.
