JULY 25, 1966

8 p.m.

CATTLEYA CULTURE, DISEASES, ETC.

by

Sara R. Campos

Sara R. Campos has a B. S. degree in Biological Sciences. She was associated with the Fred A. Stewart Company for several years and for the last five years has been with the T. M. Sanders Orchids in Santa Ana. She has specialized in the propagation of the orchid from the laboratory technique of sowing the seed and meristem cultures to the adult stage of the plant. She has done work on various studies on nutrition of seedlings and fungal diseases associated with Cattleyas. The subject of the evening will deal with various aspects of Cattleya culture and short discussion on identifying diseases, treatment, etc.

Last month Lloyd de Garmo gave us a very interesting and illustrated talk on recent Cymbidium Awards.

The plant table was conducted by Norris Powell and Paul Brecht. There were lots of interesting plants on the table. Continue to bring your plants out for everyone to see.

The plants for the drawing this month will be furnished by the T. M. Sanders Orchid Company of Santa Ana. There will be many new and interesting hybrids on this display.

REMEMBER: AUGUST 26th - LUAU - LUAU - LUAU - LUAU

This is one of our most important events of the year.

SUMMER CARE FOR CYMBIDIUMS

KEEP CYMBIDIUM ORCHIDS MOIST, WATER THEM OFTEN ENOUGH TO KEEP SOIL MOISTURE CONSTANT. IN ADDITION, SYRINGE THIS FOLIAGE DURING HOT WEATHER. THEY NEED PLENTY OF PLANT FOOD DURING THEIR SUMMER GROWING SEASON.

At Last! THE BREAKTHROUGH YOU HAVE BEEN WAITING FOR!

Agbotanical Enzymes

A Vital Supplement To Increase Plant Growth

Just spray it on and watch the results you have always wanted

"WHAT ARE ENZYMES?"

Enzymes are nature's chemical tools. They act as organic catalysts that speed up chemical changes in cells without taking part in the change themselves.

These enzymes, amylase and protease, break down the complex food materials into simpler, more assimilable forms. As a result, this encourages growth of roots, foliage, and stimulates early blooms. Leaves assume a more erect stance and plants become more tolerant to light.

Orchid-zymes are compatible with other insecticides, fungicides, and fertilizers and may be applied in conjunction with these, even in a "shot gun" application. "Orchid-zymes" is **not** just another plant food, but truly a **new and proven** product that contributes to the growth of plants.

It is completely available to plants giving **quick and lasting** results.

An Important Bonus: "Orchid-zymes" will greatly reduce algae on pots, benches, compost and floors. It dissolves the unsightly white encrustations of fertilizers and chemicals that normally burn sensitive root tips.

Pints \$2.79

Quarts \$4.19

Gallons \$8.95

25% grower discount on case of four gallons
